OVERVIEW

Parkwood Mennonite Home Inc. is a 96-bed long-term care home that is accredited with Accreditation Canada. We are a not for profit, faith-based Continuum of Care located in Cambridge.
Ontario. The Home opened 60 years ago (1963) and it offers private and semi-private accommodations. The long-term care home is part of a Campus of Care, with Retirement, Independent living and Health and Wellness Center. The Homes faith-based values are embedded in everything it does. They are expressed through our Culture of Kindness, operating principles, human resources policies, and internal and community relationships. The values are evident in our ongoing commitment to relieve poverty; provide safe and kind care; support the mind, body and spirit, and offer peace of mind for residents and their family members.

At Parkwood Mennonite home Inc, our Vision is to Build a Community for All. Our values are Faith, Kindness, Truth, Excellence and Accountability and honour our Welcome Statement. As a community founded in God’s love for all and ground in faith, each person is valued and respected. We honour the spiritual dimensions of the human experience and believe that with love the extraordinary is possible.

Our operating principles include:
- Nurturing the mind, body and spirit
- Love thy neighbor as thy self
- Be honest and transparent
- Embrace a new way of doing things
- Be responsible to those entrusted to our care.

Our Commitment:
We help seniors live with dignity, regardless of their financial resources, in a safe and kind environment where all are welcome.

We care for the whole person to support their financial, emotional, social and spiritual needs.

We provide peace of mind for residents and their families.

Kindness is built into our culture, deliberately fostered, invested in, supported, recognized and rewarded.
REFLECTIONS SINCE YOUR LAST QIP SUBMISSION
For the past three years Parkwood like other members of the Longterm Care sector has been challenged by the COVID 19 pandemic. Initially the Home experienced challenges in obtaining Personal Protective Equipment supplies, and in managing the ongoing changes to public health guidelines and Ministry of Health Directives. The Home experienced the challenges of COVID outbreaks, and staffing. Throughout the pandemic, the focus remained on our residents and providing quality care, utilizing our Culture of Kindness. We relied on relationships with our partners in the sector from our Ontario Health Team KW4, IPAC hubs, suppliers, sector partners, Public Health, our associations of OLTCA and Advantage Ontario, and other operators in the Long-Term Care sector. To keep our resident safe, we have often gone above and beyond the needed guidelines. The home was very successful in implementing all changes as needed during the pandemic and embraced all Directives issues. The Home embraced virtual technology, often having daily pandemic meetings at the start of the pandemic, virtual consultations, and virtual care conferences, when families could not enter the long-term care Home.

PATIENT/CLIENT/RESIDENT ENGAGEMENT AND PARTNERING
The Home has added clinical enhancements to our software of Point Click Care, including clinical connect enhancements, Infection Control Module, and Practitioner engagement. We are anticipating implementing Prescriber Computer Order Entry within the next year.
Parkwood joined with Fairview Mennonite Homes to have regular Leadership Team meetings, allowing the communities to support one another with all the challenges of the last three years. Our staff found this very supportive and there was great communication through out the leadership. There was never any hesitation to come together over a virtual platform to review and discuss evolving changes.
Our partnerships with our Associations provided guidance in the implementation of the Fixing Long-Term Care Act, and helped us to support Best practice in the Homes.
We have embraced changes to our Medication Safety Program and joined the Medication Safety Task force to enhance our medication safety for our residents.
Our Family council has remained active and we value their input and involvement, and they are happy to return to in person meetings. We have an active Resident Council in our Home. We keep our families and residents updated of our quality initiatives and they are always welcome to join us at our Quality Meetings, and we keep our residents updated at their regular Resident Council meetings.

PROVIDER EXPERIENCE
The challenges of the pandemic brought into focus Infection Prevention and Control and resident safety while providing quality care. The team has embraced all changes with resilience and perseverance.
In 2021 we moved from CARF to Accreditation Canada and completed the primer for Standards. We are happy to report that we had no unmets during our assessment. We are busy preparing for the full Accreditation this Fall 2023.
We look forward to getting back to basics, with regular meetings, audits and our ongoing Quality Initiatives.
We continue to embrace all the new changes that the pandemic brought, with our enhanced Infection Control process, outbreak management and emergency plans. We have implemented all the changes to the Fixing the Long-Term Care Act, and Infection Control Standards.

**WORKPLACE VIOLENCE PREVENTION**

At Parkwood Mennonite home, Workplace Violence Prevention is a priority for us as we want to ensure the workplace is free from workplace violence and will make every effort to promote the dignity, self-worth and human rights of every resident and employees. Any complaint of workplace violence received by management will be taken seriously and will be formally investigated promptly in a discreet, objective manner. The Leadership team at Fairview strive to make workplace violence prevention a priority for our organization. We use a five-step process to manage health and safety at Fairview:

1) Written Standards  
2) Communication  
3) Training  
4) Evaluation  
5) Acknowledge Success and Making Improvements

The home has an active Joint Health and Safety committee, and they are involved in and consulted about the development, establishment and implementation of violence prevention measures and procedures (the violence and Harassments prevention program).

Our staff participate in annual education on Workplace Violence Prevention training and receive education prior to starting to work. Management (with worker involvement) assesses workplace violence hazards in all jobs, and in the workplace. It reviews risk assessments annually, as well as when new jobs are created, or job descriptions are changed substantially. The home is also enhancing a new policy for Care Transitions of residents when they move between health care facilities, between home areas in the home and between care providers, including change of shift. Education is provided to staff yearly on Gentle Persuasion approach, and other behaviour training. Public Services Health and Safety association (PHSA), has a Workplace Violence During Care Transitions toolkit, which we using to support our Care Transitions policy.

**PATIENT SAFETY**

The restrictions that came with the pandemic were hardest on our residents especially at the beginning of the pandemic in 2020 when no families could come into the Home, this was challenging for all concerned, but had the most significant impact on the residents. The residents have also endured many periods of isolation, frequent testing and absences from seeing family and visitors for extended periods of time.

We continue to embrace the changing public health guidelines, and have welcomed back many volunteers, and many programs have returned back to the Home, including entertainers, pet visits, special events, socials and many outings.
HEALTH EQUITY

Informed by our Vision, to Build a Community for All, our hiring practices intentionally embrace diversity, equity and inclusion. The faces of our community are represented in our staff in every area. We encourage French-speaking candidates to apply as we build capacity to support the Francophone Community. The Board of Directors has also moved to embrace diversity, equity and inclusion with a 2022 by-law amendment that welcomes one third of its members from a non-Mennonite background.

OTHER

In 2022 Fairview Parkwood Communities was named one of Canada’s Most Admired Corporate Cultures in the Broader Public Sector by Waterstone Human Capital Management. This national award recognizes best-in-class organizations for having cultures that help enhance performance and sustain a competitive advantage. Applications were invited through a nomination process. Fairview Parkwood Communities was nominated for our commitment to build a community where each person is valued, respected, welcomed and treated with kindness.
SIGN-OFF

It is recommended that the following individuals review and sign-off on your organization’s Quality Improvement Plan (where applicable):

I have reviewed and approved our organization’s Quality Improvement Plan on March 30, 2023

</tbody>
</table>

Change Ideas

Change Idea #1 To improve the resident participation of those that qualify to participate in the annual survey

Methods | Process measures | Target for process measure | Comments
--------|------------------|---------------------------|----------------|
Review and revise the current survey with the Corporate Quality Committee annually. Continue to conduct the survey annually encouraging all the residents to participate. Utilize staff and students for data collection where appropriate | To have 80 % of residents eligible to participate in the annual survey | Total number of participants over the total number of resident populations annually |                          |

Change Idea #2 Address concerns from the surveys, and ensure all follow up is done, that the home follows our policies and procedures

Methods | Process measures | Target for process measure | Comments
--------|------------------|---------------------------|----------------|
|                          |                 |                           |                  |
All concerns to be addressed at the time 100% of the concerns will be addressed, Total number of addressed concerns of the data collection or referred to the and tracked over the total number of surveys appropriate department completed.

**Measure**  **Dimension:** Patient-centred

<table>
<thead>
<tr>
<th>Indicator #3</th>
<th>Type</th>
<th>Unit / Source / Population</th>
<th>Source / Period</th>
<th>Current Performance</th>
<th>Target</th>
<th>Target Justification</th>
<th>External Collaborators</th>
</tr>
</thead>
<tbody>
<tr>
<td>My food is not the right temperature when I get it</td>
<td>C % / Residents</td>
<td>In house data, InterRAI NHCAHPS survey / 2024</td>
<td>65.00</td>
<td>80.00</td>
<td>To increase score above the median or better survey, NHCAHPS survey / 2024</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Change Ideas**

Change Idea #1 Obtain more information from residents about temperature change. The Home had done a lot of tray service during the pandemic and this could be related. Provide planned Education sessions and reminders to staff that microwaves are available at the point of service.

<table>
<thead>
<tr>
<th>Methods</th>
<th>Process measures</th>

Report Access Date: March 30, 2023
To enhance our Palliative approach to care to include physical, Residents collection / in house data 0.00 96.00 Help residents and families have a greater sense of control psychosocial, spiritual at all stages of 2024 a resident's progressive chronic illness.

### Change Ideas

**Change Idea #1** A palliative approach to care will be developed for each resident by way of assessments when admitted to long term care, when significant changes occur and annually.

<table>
<thead>
<tr>
<th>Methods</th>
<th>Process measures</th>
<th>Target for process measure</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Identify all assessments, of RAI/MDS, score, Chess score, PSI, and other assessments. Consents will be obtained by all residents and also in having meaningful conversations with residents and SDM. Identification of palliative needs will be obtained from residents and or SDM for each resident that qualifies for palliative approach to care and then care palliative approach for care. Goals of care will be identified for each resident that qualifies, Goals of care will be identified in care planning in collaboration with residents and or SDM for their approval. Goals will be reviewed at admission and annual care conferences and when there is a significant change.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Change Idea #2** Increase staff, residents and families understanding of palliative care approach to care and the difference to end of life care.

<table>
<thead>
<tr>
<th>Methods</th>
<th>Process measures</th>
<th>Target for process measure</th>
<th>Comments</th>
</tr>
</thead>
<tbody>
<tr>
<td>The homes staff will be re-educated on a To track the changes to education palliative approach to care and the materials used and education sessions difference between this and end of life. provided to both staff, residents and Educational support tools will be developed and resident handbook on admission will be updated with palliative approach to care. Will look to assess and identify all residents over the coming year with obtaining consent and palliative</td>
